## ABOUT ME.

Systems Engineer with vocation and passion for self-study and continuous learning in new technologies; With experience in the financial and insurance sector as a developer in .Net, T-SQL and Python technologies. I have served in different roles such as quality analyst, scrum master and technical specialist. I have training and skills in managing data analysis tools such as Apache Spark, Mongo DB, SAS Guide and HVR (Software for the integration of large volumes of data), I also have soft skills to accompany and synchronize technical teams (analysis and requirements gathering, architecture, development, testing and DevOps), ability to support the technological operation of solutions in production. I am a person with intellectual and professional ambition, focused on results for the client and development of new challenges.
